1. Purpose of Project: _____

2. Date(s) of work to be performed: _____
3. Location of Project (include map): _____
4. Describe Work: _____
5. Does the Project constitute an emergency? (circle one) yes no
Why: _____
6. Contractor (if not Permittee): _____
(Must also complete a Contractor Registration Application)
7. Name of Authorized Agent (please print): _____
8. Mailing Address: _____
9. Phone: _____ Email: _____

C. REQUIREMENTS

1. A contractor shall restore property damaged or destroyed by construction on or adjacent to the right-of-way to a condition that is as good as or better than the pre-existing condition of the right-of-way or adjacent property, as determined by the Director. Streets shall be restored based on their Pavement Condition Index (PCI) prior to construction, as determined by the Director during the application process, as follows:

- (1) PCI of 0—40. Excavations in streets and/or rights of way with PCI values of 40 or less shall be deemed to be excavations in streets with nominal loss of life. The contractor shall promptly repair the trench envelope and surface in accordance with specifications set forth in the UECM.
- (2) PCI of 41—70. In the event of an excavation in a street or right-of-way having a PCI of 41—70, the contractor shall promptly repair the trench envelope and surface, including pavement and foundation, to the same condition, or better, than existed before the commencement of the work in accordance with the specifications set forth in the UECM. In the event of failure of the repair during the guaranty period, the contractor shall reimburse the city for its pavement restoration cost.
- (3) PCI of 71—100. Excavations in streets and/or right-of-way with PCI values of 71 or greater shall be deemed one hundred (100) percent loss of pavement life. These excavations require block to block and curb to curb pavement reconstruction. Use of a hot mix asphalt repaving process is an option with approval of the Director. In the event of any trench failure in the street or right-of-way during the guaranty period, the contractor shall reimburse the city for its costs to repair the failure. Additionally, in the event of such failure, the contractor shall within forty-eight (48) hours repair the subject trench envelope if required by the Director.

2. Restoration shall be completed in a timely manner as specified by schedules prepared and provided by the Director. Contractors of the right-of-way shall be fully responsible for the performance of all trenches or other restorative work for a period not to exceed twenty-four (24) months from the completion of the work and/or inspection by the Director. Any trench or other restorative failures resulting from any work authorized by this article shall be immediately repaired upon notification by the city and are subject to inspection and approval by the city.

3. All repairs to right-of-way of any PCI are guaranteed by the contractor making the repair and the permittee causing the repair to be made for the life of the street. The life of the street for these purposes is defined to be until such time as that certain street or right-of-way is repaved by the city or another, in the same location as the excavation, or until such time as the PCI Index of such street or right-of-way drops to below 40.

D. PAVEMENT CONDITION INDEX (as determined by Director): _____

_____ **Initial Required – All work must conform to the COSA UECM Second Edition as adopted by the City of San Antonio and the City of Balcones Heights.**

_____ **Initial Required – Traffic control plan (TMUTCD) must be submitted with WiROW application.**

Signature of Permittee/Agent: _____
